

lecture 25 :- Revision.

Killing Null.

$$A \rightarrow \lambda.$$

$$S \rightarrow AB/B.$$

$$B \rightarrow aa$$

~~$$A \rightarrow \lambda.$$~~

Killing UNIT.

$$A \rightarrow a.$$

$$B \rightarrow A \Rightarrow B \rightarrow a$$

$$B \rightarrow C \rightarrow A \Rightarrow B \rightarrow a$$

Removing Useless Productions.

1- Non-Reachable.

The production that can never take part in the derivation of any string $A \rightarrow bc$ where A is not reachable from S .

$$S \rightarrow BC/aa/bb.$$

$$B \rightarrow a$$

$$C \rightarrow ac$$

$$A \rightarrow bc.$$

2- Non terminating Substitution.

A variable (non-terminal) that can never take part in the derivation of any string.

$$B \rightarrow aB.$$

Ex:- Remove all useless productions from the Grammar.

$$S \rightarrow aS/A/C$$

$$\rightarrow A \rightarrow a$$

$$\rightarrow B \rightarrow aa \text{ X}$$

Step 1:- find all productions that ends on terminal.

$$\rightarrow B \rightarrow aa \quad X$$

$$C \rightarrow aCa$$

Non-Reachable =

$$B \rightarrow aa.$$

After Removing of Non-Reachable.

$$\checkmark \boxed{S \rightarrow aS/A} \quad X.$$

$$A \rightarrow a$$

$$\boxed{C \rightarrow aCa} \quad X.$$

Step2:- Identify Rhs of the form.

Non-terminal \rightarrow term + Non-terminal.

$$S \rightarrow C \rightarrow aCa$$

$$C \rightarrow aCa.$$

$$\rightarrow aacaa.$$

$$\rightarrow aaaa$$

$$\rightarrow \dots$$

After Removing Non-terminating Production.

$$S \rightarrow aS/A$$

$$A \rightarrow a$$

CHOMSKY NORMAL FORM (CNF).

A CFG is in CNF if every Production is in one of the three forms.

$$1- \quad A \rightarrow BC$$

B & C are Not Starting Variables.

$$2 \rightarrow \quad A \rightarrow a$$

$$3 \rightarrow \quad S \rightarrow h \quad S \text{ is the Starting Variable.}$$

Ex:-

$$S \rightarrow AS/a$$

$$A \rightarrow SA/b.$$

"Given a CFG, How to Convert it into CNF"

Step 1:- Add a new Variable S_0 . add the production $S_0 \rightarrow S$.

Step 2:- Eliminate Null productions.

Step 3:- " UNIT " .

Step 4:- Add rules of the form $V_t \rightarrow t$ for every terminal t . and replace t with V_t .

Step 5:- Transform the remaining rules to the form $A \rightarrow BC$.

$$\begin{aligned} V &\rightarrow \underline{A_1 A_2} A_3 A_4 A_5 \rightarrow \underline{B_1 A_3} A_4 A_5 \rightarrow \underline{B_2 A_4} A_5 \\ \checkmark B_1 &\rightarrow A_1 A_2. & \checkmark B_3 &\rightarrow A_5. \\ \checkmark B_2 &\rightarrow B_1 A_3. \\ \checkmark B_3 &\rightarrow B_2 A_4. \end{aligned}$$

Ex:-

$$S \rightarrow CSC \mid B$$

Terminal = $\{0, 1\}$.

$$C \rightarrow 00 \mid 1$$

$$B \rightarrow 01B \mid 1.$$

Step 1:-

$$S_0 \rightarrow S.$$

$$S \rightarrow CSC \mid B$$

$$C \rightarrow 00 \mid 1$$

$$B \rightarrow 01B \mid 1.$$

Step 2:-

Eliminate Null productions.

$$S_0 \rightarrow S.$$

$$C \rightarrow 1.$$

$$S \rightarrow CSC \mid B \mid CS \mid SC \mid S$$

$$C \rightarrow 00 \mid \cancel{1}$$

$$B \rightarrow 02B / 1.$$

Step 3:-

Eliminate Unit Production.

So \rightarrow $\begin{matrix} CSC \\ 1101B \end{matrix} | \begin{matrix} 2101B \\ 1101B \end{matrix} | CSC | SC.$

~~$S \rightarrow \beta$~~ $S \rightarrow 1$

$S \rightarrow csc \mid \cancel{c} \mid cs \mid sc \mid \cancel{s}$

$$C \rightarrow 00$$

$$B \rightarrow 02B / 1.$$

$S_0 \rightarrow CSC \mid 02B12 \mid CS \mid SC.$

$S \rightarrow CSC | \underline{1} | CS | SC | \underline{01B}.$

$$C \rightarrow \underline{00}$$

$$B \rightarrow \underline{02} B / 1.$$

Step 4:-

Create V_t for every terminal t .

$S_0 \rightarrow CSC \mid ^202B \mid 2 \mid CSC \mid SC.$

$S \rightarrow CSC \mid 1 \mid CS \mid SC \mid \epsilon \mid B.$

$$C \rightarrow \begin{matrix} \mathbb{Z} & \mathbb{Z} \\ 0 & 0 \end{matrix}$$

$$B \rightarrow {}^Z_0 2 B / 1.$$

$$z \rightarrow 0$$

$S_0 \rightarrow CSC \mid Z^1 Z B^1 Z \mid CS \mid SC.$

S → CSC | ^Y1 | CS | SC | 2AB.

$C \rightarrow z \underset{\vee}{z} \quad y \quad y$

$$B \rightarrow z^{\uparrow} B / \uparrow.$$

$$z \rightarrow 0$$

$$Y \rightarrow 1.$$

$$S_0 \rightarrow \underline{CSC} | ZYB | Y | CS | SC.$$

$$S \rightarrow CSC | Y | CS | SC | ZYB.$$

$$C \rightarrow ZZ$$

$$B \rightarrow ZYB | Y.$$

$$Z \rightarrow 0$$

$$Y \rightarrow 1.$$

Step 5:- Take care of long Rules.

$$S_0 \rightarrow D\check{C} | E\check{B} | Y | D | S\check{C}.$$

$$S \rightarrow D\check{C} | Y | D\check{C} | S\check{C} | E\check{B}.$$

$$C \rightarrow ZZ \quad \uparrow$$

$$B \rightarrow E\check{B} | Y. \quad \uparrow$$

$$Z \rightarrow 0 \checkmark$$

$$Y \rightarrow 1 \checkmark$$

$$D \rightarrow CS. \checkmark$$

$$B \rightarrow ZY \checkmark$$
